# Works on select phones

A growing number of Android phones support the ability to tap to pay with Google Wallet. These phones have a built-in near-field communications (NFC) chip that enables secure payments.

# Where it works

There are hundreds of thousands of stores nationwide that accept contactless payments. Look for these symbols at checkout.

# Saving made simple

Google Wallet lets you discover and save great offers from your favorite shops. To redeem them, simply scan the barcode at checkout, or show the offer on your phone to the cashier.

---

# Safe and secure

Shop confidently with 24/7 fraud monitoring and [Google Wallet Purchase Protection](#), which covers 100% of eligible unauthorized Google Wallet transactions. Plus, if you lose your phone you can quickly and easily disable the app at [wallet.google.com](http://wallet.google.com).
